

SAMUEL G. MUNOZ

FULLSTACK WEB DEVELOPER

Career Objective

Doing undergraduate research on the Collatz Conjecture in college made me realize that a career in academia was not a good fit for me. For the next 2 years I diligently saved money from being an Amazon Delivery Associate, in order to take the Full-Stack Web Development certificate offered by Noble Desktop. I am a young, aspiring and hard-working immigrant looking to leverage my skills to successfully fill the Web Developer role at your company.
